

# SERVO DRIVE

## Series Performance

### Features of ProNet series

- 5 times higher responsiveness than previous products.
- Auto-gain adjustment
- 17-bit serial encoder. Absolute encoder and resolver are optional.
- Expansibility: Expansion DP100 module is available for Profibus-DP.
- Absolute encoder is available.

### Features of EDC series and EDB series

- Speed-forward feedback function.
- Auto-inertia detector.
- Switch among position, torque & speed control freely.

	EDC series	EDB series	ProNet series	
Rated power	200W~750W	750W~5kW	200W~5kW	7.5kW~15kW
Power supply	Single phase AC200V	Three-phase AC200V	Three-phase AC200V	Three-phase AC400V
Feedback interface	Wire saving incremental encoder (2500P/R)		17-bit serial encoder (131072P/R)	Resolver (65536P/R)
Control mode	Position	Torque, Speed, Position	Torque, Speed, Position	
Reference pulse	Double pulse input	Double analog input Double pulse input	Double analog input Double pulse input	
Communication interface	RS-232	RS-485		
Field bus	CANopen	—	CANopen、Profibus-DP (optional)
